## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

2. Claims 1, 3, 5, 7 rejected under 35 U.S.C. 102(a) as being anticipated by Kurn et al., US Pre-grant Pub No 20020071567 (hereafter referred to as '567).

As to claim(s) 1, 3, 5, 7:

3. '567 teaches a secure database system comprising:

- Storage device for storing information, an encryption key, and encoded information / One of the keys is configured within a Key Repository process to maintain the integrity of critical information on the database (Page 5, Paragraph 74, '567)
- Input/Output device for inputting and outputting information stored in storage device / Bi-directional dataflow from key repository to/from applications (Fig 1, Elements 20 and 40, '567)
- Encoding device for encoding/decoding information / entries protect their respective secret by a password-based public-key encryption method (Page 5, Paragraph 76, '567)

- When outputting, encryption key is encoded by using another encryption key, both encoded information and encoded encryption key are output / Key repository gives credential file and password to application (Fig 2, Element 216, '567)

### ***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 2, 4, 6, 8 rejected under 35 U.S.C. 103(a) as being unpatentable over '567 in view of Keutzer, "Advanced Topics in CAD Component Based Design of Electronic Systems Lecture 9.2".

As to claim(s) 2:

6. '567 teaches a secure database system for storing encrypted information and encrypted keys for input/output. '567 does not specifically teach for the Input/output device, encoding device and storage device to be constituted on the same semiconductor chip. Keutzer teaches the benefit of integrating semiconductor segments ("Summary of Motivation"). It would have been obvious to a person of ordinary skill in the art at the time of invention to integrate the separate segments of '567 to a single semiconductor. One of ordinary skill in the art would have been

motivated to integrate the separate segments of '567 to a single semiconductor because a reduction in cost results that "easy integration is desirable for all segments" ("Utility of Reuse- Semiconductor").
